HORSE & CATTLE DRINKER

1-800-451-2230

## REVOLUTIONARY HORSE & CATTLE DRINKER

The water bowl fills with fresh clean water each time your horse or cow puts its nose into the drinker. After the drink, the excess water drains away, leaving an empty bowl.

There's no water to freeze, accumulate debris or grow algae. Since the water supply and valve are below the frostline, your animals enjoy the natural cool water in the summer and warmer water in the winter.

- ◆ NO ELECTRICITY
- ◆ SELF-CLEANING
- ◆ NON-FREEZING
- ◆ FULLY AUTOMATIC
- ◆ MAINTENANCE FREE

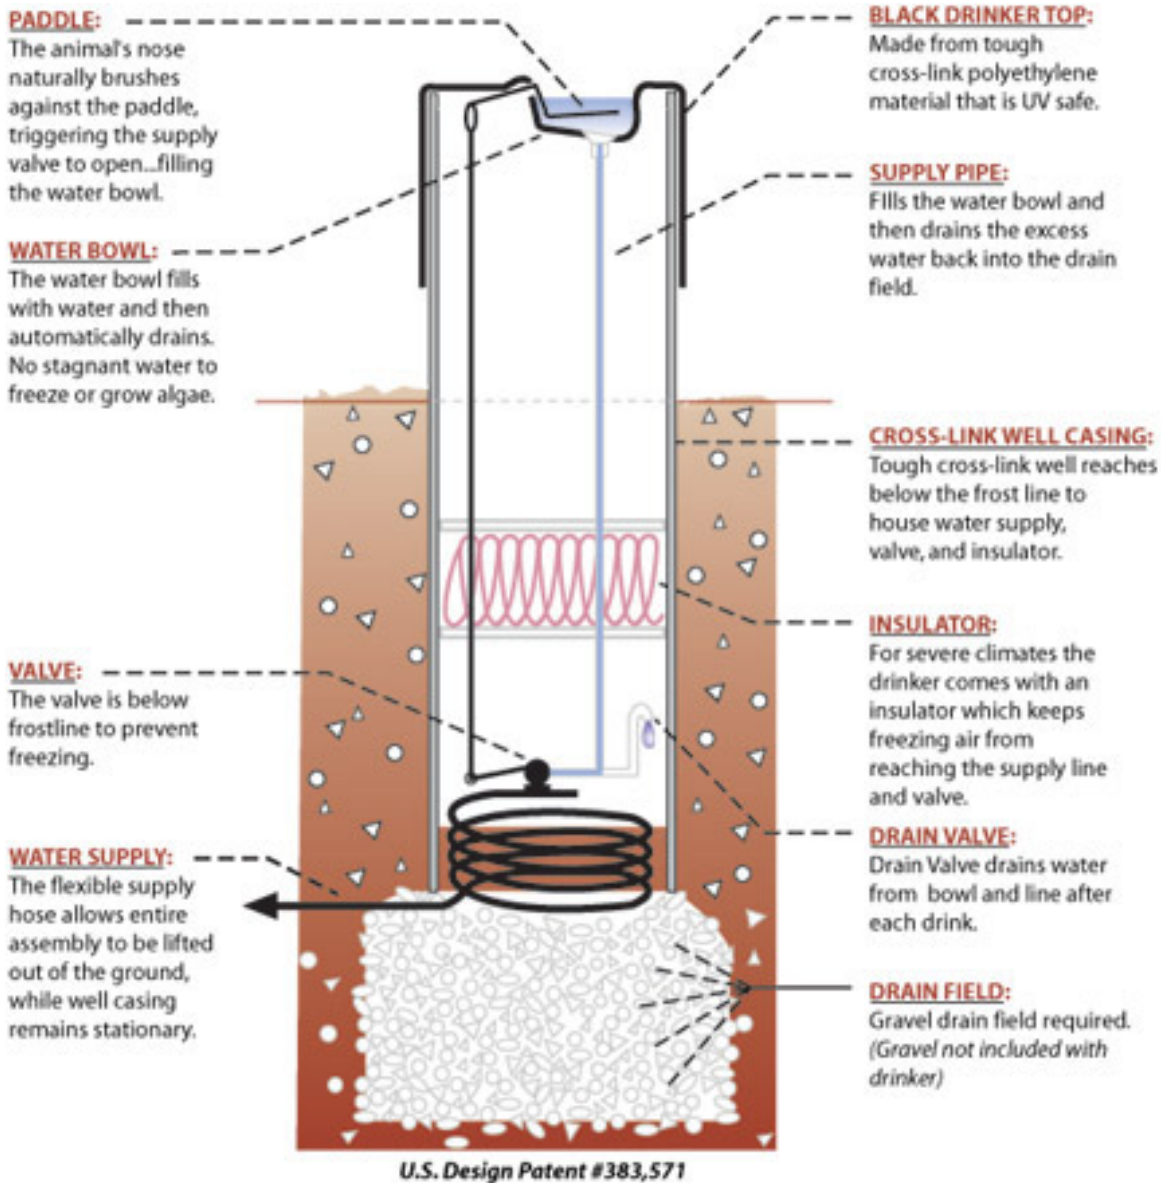

## "COOLER WATER IN THE SUMMER & WARMER WATER IN THE WINTER & IT'S ALL AUTOMATIC

Horses are my life and my living. I've tried just about every device around to take better care of my animals and make my job easier.

When it comes to watering, there's only one way to water: Bar-Bar-A Horse and Cattle Drinker. With it, my animals get cool water. It never freezes and it cleans itself. I just installed it and forgot about it. That's the way watering ...Ought to be.

**Lewis Field**  
**Cowboy Hall of Fame**  
**5-Time PRCA World Champion**  
**1988 Olympic Gold & Silver**

## TEACHING HORSES OR CATTLE TO DRINK IS REALLY VERY SIMPLE.

Most animals learn how the drinker works on their own. Natural curiosity and nuzzling the drinker paddle turns on the water. Once they taste the water, they know where to go.

Occasionally you may need to teach an animal how to drink. Just remove all other water sources for a day, until the animal becomes thirsty. Then, lead the animal to the drinker and push down on the paddle. Once the animal smells the water, it will know what to do!

## WHY I INVENTED THE BAR-BAR-A DRINKER

We've boarded horses for years. Back in the winter of 1982 we had 3 animals that just wouldn't eat or drink. We had installed the latest electrically heated drinkers to prevent freezing.

I had a veterinarian over and neither of us could figure out a solution. While we were talking, the veterinarian's assistant stuck his finger in the drinker water - and he got SHOCKED! We felt awful. Our electric drinker had been shocking the horses every time they tried to take a drink.

I immediately pulled the plug and went to the workshop to build a better drinker. The first drinker is still in use today in one of our stalls. Since then, we have changed to newer and tougher material but the design concept is exactly the same.

It's a proven design with  
over 20 Years of Experience.

## ENDORSEMENTS

"We love it!! Our Bar-Bar-A Drinker has been in one year with no trouble. My wife says it is the best investment we've made. We'd do it again. It's in a pasture connected to well water. We have Hunter-Jumpers and they have no trouble with it. It's 20 degrees today."

Chris  
Danville, Virginia

"After using our Bar-Bar-A drinkers the last two years, we are convinced it is the best product we have found. We have been using four drinkers for both cattle and horses. The water is always fresh, warm in the winter and cool in the summer. More importantly, no electricity is needed to keep the drinkers from freezing."

Kent  
Rupert, Idaho

"I'm real happy with my Bar-Bar-A Drinker. I've had it one year and last winter it got down to 30 below and I had no problems. My horses learned quickly how to drink."

Don  
EdgeMont, South Dakota

## THANK YOU FOR YOUR INTEREST IN THE BAR-BAR-A HORSE & CATTLE DRINKER

Please find enclosed the **brochure** you requested. The **Bar-Bar-A works on a different principle** than other automatic waterers. Since the valve is buried below the frost line our unit does not require electricity. This means no monthly electric bills. Also, don't worry about your animals being electrocuted by an electric waterer or the power going off from a winter storm or summer thunder storm. Besides being non-electric **there are many more reasons to own a Bar-Bar-A:**

- **Fully Automatic**
- **Self – Cleaning**
- **Animals Drink More Resulting in Better Health**
- **Conserves Water**
- **West Nile Virus Resistant(there is never any standing water for mosquitoes to lay eggs)**
- **Durable**

The Bar-Bar-A is made from quality and durable material that will last for years of trouble-free service. **Installation is as simple** as digging a hole and connecting your water-line with our water-line. You will be given step by step instructions and we have an **installation hot-line** you may call. We will help you with any need you have.

### The Bar-Bar-A 3 Fold Advantage

Your investment in a Bar-Bar-A unit will many times over the years pay for itself from: **1-Saved money on electricity, 2- Saved energy and time from weekly cleaning and maintenance of other algae collecting watering devices and 3- Animals that drink more and are healthier.** We sincerely believe the Bar-Bar-A is the best watering system that money can buy! If you have any questions that are not covered in this material we would consider it a pleasure to make your acquaintance. Call our toll free number or direct line listed below.

Thanks and Happy Watering.
